# NOVOSIBIRSK REGION

The Novosibirsk region is the key region of Siberia. The population of the region is 2.8 million people. Novosibirsk is the third largest city in population in Russia and the biggest metropolitan city beyond the Ural Mountains.

The economic structure of the Novosibirsk region is unusual for Siberia. The regional economic growth drivers are high-tech innovations, industrial production, building industry, real estate market, science, transport, utility systems, information technologies, agriculture and trade.

Novosibirsk is a scientific and educational world-class center. More than 100 large enterprises and 1700 small enterprises connected with technology development activities work in the Novosibirsk region. The State Research Center of Virology and Biotechnology VECTOR is also located here, one of the largest virologic and biotechnological centers of Russia.
